Insulated cooler with lid
(keep in kit box)

Ice pack
(place in freezer immediately)

Plastic bag containing:
4 color-coded saliva tubes and 4 straws

Requisition form

Patient survey

(USA Only)
FedEx Clinical Pak

(USA Only)
FedEx
Billable Stamp

3

PREPARATION

The testing for this profile consists of collecting 4 saliva samples for hormone analysis.

BEFORE YOU START: Please read all of the instructions carefully. Consult your physician for specific instruction and before stopping any medications. Make sure your physician has selected a test profile on the requisition form. Collect saliva on a day that is determined by you and your provider, considering the recommendations on page 4.

2 DAYS BEFORE AND DURING COLLECTION

If testing melatonin, avoid all nuts, fruits, fruit juice, wine, and rice.

DAY OF COLLECTION

Do not take any supplements until after you have collected all four samples.

First saliva collection **MUST** be 30 minutes after awakening. Set a timer if necessary.

Do not eat or drink anything 1 hour prior to saliva collection.

Do not brush, floss, or have dental work done 30 minutes prior to saliva collection.

Do not consume food or drinks that contain caffeine.

Before each saliva collection, wash hands and rinse mouth with water, but wait 10 minutes to collect your saliva sample (to avoid dilution.)

Use of cosmetics, other than “anti-aging” creams, is permitted.

4

RECOMMENDATIONS

WOMEN & MEN ON HORMONES (estrogen, progesterone, testosterone, DHEA)		
Topical Hormones (cream)	Last dose prior to collection should be within a window of 12-24 hours before collecting your first sample	Do not apply topical or use sublingual hormones throughout the entire day of saliva collection. This will contaminate your sample and your test results
Sublingual Hormones or Troches (dissolved under tongue)	Last dose prior to collection should be within a window of 24-36 hours , followed by two full glasses of water to cleanse the tissues. Then collect your first sample.	
Oral Hormones (pills)	Should be used as prescribed on the day of collection	
Injections, Subcutaneous Pellets and Transdermal Patches	Collect at the halfway point between doses	

CORTISOL/GLUCOCORTICOID SUPPLEMENTATION

CONSULT WITH YOUR PROVIDER for instruction if you are taking a cortisol supplement for adrenal support (or any other glucocorticoid for medical reasons). Note: certain medications, including hydrocortisone creams and asthma inhalers, contain cortisol. To evaluate your natural cortisol production, it is recommended to stop using cortisol-containing products 5 days prior to sample collection. Consult with your provider prior to stopping cortisol-containing medication(s).

MELATONIN SUPPLEMENTATION

If testing melatonin, last dose should be at least 36 hours before first saliva sample collection.

OTHER	DAY TO COLLECT
Women with menstrual cycles	Collect 1 day during days 19-23 of a 28-day cycle, counting the first day of your period as day 1
Post-menopausal women	Collect any day of the month. If you are taking hormones or are on cortisol and/or melatonin supplementation, please read and follow the recommendations listed above
Women who have had a hysterectomy	
Men not on hormones	
Adrenal function profiles only (cortisol, sIgA, and/or DHEA)	
Women w/ hormonal IUD (and no cycle)	

Call your provider with additional questions. Please do not send any medications with your kit.

5

COLLECTING SALIVA

Collect saliva on a day that is determined by you and your physician, considering the recommendations on page 4.

1

Collect before breakfast in the PINK TUBE (AM 30)
Collect 30 minutes after awakening (set a timer)

2

Collect before lunch in the GREEN TUBE (NOON)

3

Collect before dinner in the ORANGE TUBE (EVENING)

4

Collect right before bedtime in the BLUE TUBE (NIGHT)

- 10 minutes before each saliva collection, wash hands and rinse mouth with water.
- The first saliva collection must be 30 minutes after awakening. Timing is critical.
- Fill all four tubes regardless of how many tests are ordered.
- Each tube should be 3/4 full. Bubbles or foam are OK.
- Use of the included straws to funnel saliva into each tube is optional. Dispose of straws before shipping.
- After each saliva collection:
 - ✓ Snap saliva tube closed tightly.
 - ✓ Record the date and times of the collection on the bag and on the requisition form.
 - ✓ Place saliva in freezer immediately. When all four tubes have been collected, place all tubes into plastic collection bag with absorbent material and keep in freezer with frozen ice pack until ready to ship.
